FIRECHEX

FIRE PROTECTION SERVICES

It's What We Do...

FIRE SAFETY MAINTENANCE

FIRECHEX Fire Safety Equipment Servicing includes:

- Exit & Emergency Lights
- Fire Indicator Panels (FIP)
- Fire Extinguishers
- Fire Hose Reels
- Fire Pumpsets
- Fire Hydrant Systems
- Fire Doors & Frames
- Fire Sprinkler Systems
- Smoke & Heat Alarms
- Emergency Warning Intercommunication System (EWIS)
- Building Occupant Warning System (BOWS)
- Passive Fire and Smoke Containment Systems
- Fire Blankets

REPAIRS & UPGRADES

FIRECHEX is licenced to undertake all fire related rectification and upgrade works. This includes all electrical, plumbing and door related works. In NSW, fire maintenance companies must be licensed as Water Plumbers (Fire Protection Systems) and Electricians in order to undertake or co-ordinate any repairs on your behalf. We can also assist clients in managing upgrade programs and responding to Council Fire Orders with tailored Fire Safety Solutions.

CERTIFICATION & COMPLIANCE

FIRECHEX prides itself on making the annual service and certification as simple as possible for you. We monitor when the inspection and certification is due, arrange for a convenient time and issue the notices to occupants. This is then followed through to provide a full report & the issuing of the Annual Fire Safety Statement.

MECHANICAL VENTILATION

FIRECHEX services a range of mechanical ventilation systems, electric motors, fire dampers, stairway pressurisation and related equipment. Mechanical ventilation services often form part of a buildings fire safety system or perform an important function in maintaining air quality to areas such as carparks, laundries, toilets etc. FIRECHEX can certify mechanical ventilation where it forms part of the fire system, inspect or replace dampers and service electric motors as part of a regular fire service.
